Experience

AI & Application Developer

Omsevel Software, Chennai

2024 – 2025

- Developed backend APIs, Android applications, and AI-integrated systems using Python, Flask, and SQL databases
- Worked on real-time monitoring, reporting, and application support in a team-based environment

Education

B.Tech – Information Technology

2020 - 2024

Aalim Muhammed Salegh College of Engineering
Anna University, Chennai
CGPA: 8.04 / 10

CERTIFICATIONS

- Foundation of Python Programming
- Oracle Database Administration (DBA)
- Full Stack Web Development (Frontend & Backend)
- ChatGPT Prompt Engineering for AI Application Development

PROJECTS

Full-Stack Learning Platform (Freelance)

- Built a full-stack web application using Flask and REST APIs with user/admin authentication and dashboards
- Implemented real-time reporting with MySQL/PostgreSQL and accelerated development using AI tools

AI Quiz & Chat Android Application

- Developed an Android learning app with AI-generated quizzes, chat, scoring, and feedback
- Integrated Flask backend APIs with MySQL for real-time data handling

Scooby Alert & Load Counting System

- Created a computer vision load-counting system using YOLOv5
- Enabled Android alerts and real-time monitoring for operational use
